Caldera in 140 characters

Caldera is a french software company with over 30 years of experience in developing solutions for the large-format digital printing industry.

Boilerplate

Headquartered in Strasbourg, France, Caldera is a software company developing innovative solutions for the large-format digital printing industry. Since 1991, their award-winning programs have helped print service providers to improve their productivity, cost-efficiency and color output.

Caldera solutions provide advanced color management, prepress and image processing tools for the graphics, signage and textile markets.

Today, more than 15,000 print service providers around the world use Caldera's reliable solutions to manage and scale their production.
